- Navigation Systems
- Car Phone Solutions
- Parking Sensors
- Dash Cameras
- Alarms
- Immobilisers
- Remote Central Locking Kits
- Tracking Systems
- CCTV And WiFi
- GPS Tracking Systems
- Keys and Key Programming

Loom Design Preparation

First we sit down with the customer to determine what the customers requirements are.

Once established, HSD draw up the plan (see example)

showing roughly the location of whats required.

This is sent to the customer with the breakdown of the costs and the plan.

Once agreed we then go to the vehicle measure up producing a spider loom, from that we design the looms and manufacture .

VW Camper Van Modifications

Control Boards and wiring

We provide a sophisticated yet friendly service and complete work to the very highest of standards. This board was designed and constructed to meet the needs of an NHS trust emergency vehicle. This is design loom work that will run all the vehicle flashing lights, siren and PA system on a separate split charge system, which means the main vehicle battery will not go flat.

Every design comes with its own full-colour manual showing all wiring configurations.

Please see example on the last page.

Fully Mobile Auto Electrical Service

Our equipment allows us to retrieve and analyze data from your vehicle sensors. We can analyse the vehicle and give a full printed report to show existing problems with your vehicle.

This ultimately could save you thousands of pounds, plus prevent lost time and frustration from the vehicle breaking down

Industry Expertise

Our experienced team are fully trained in vehicle diagnostics, and Fault Finding, we install Hands-free car kits, Parking sensors, GPS Tracking systems, and Satellite navigation. Serving a range of customers from the public, private, and trade sectors, we ensure that your vehicle is fully functional.

We currently work with the NHS, Hampshire Transport, Southampton City Council, Halfords Auto Centres, and lots of independent garages.

Fully mobile diagnostics service

We are based in Hampshire and offer a complete mobile service covering the following areas: Berkshire, Hampshire, Wiltshire and Surrey.

Our fully equipped mobile engineers can diagnose and fault find any cars or light commercial vehicles for electrical problems.

As the computer management of your vehicle becomes more complex so does the diagnostic software required to keep your vehicle on the road. We use a range of diagnostic equipment which will allow us to carry out all the diagnostics that traditionally have been undertaken by main dealerships.

Using high-tech equipment, we retrieve and analyse data from a range of vehicle sensors. Our team instantly show you fault codes and problems, and we discover where they are located. Often, your vehicle issues are solved on site, which protects you from problems in the future. A full diagnostic report is emailed to you along with an invoice.

We cover most makes of vehicle including Bentley, Jaguar, Mercedes, Audi, BMW, VW, Honda, Nissan, Toyota, Proton, Citroen, Peugeot, Renault, Skoda and Seat.

Key Programming Cutting

Lost Car keys can be a real hassle!

We can supply spare keys or remotes if yours are faulty, lost or stolen. We now offer a Key cutting and programming service for your vehicle at your home or place of work.

We are more cost effective than going to the Main Dealer.

Smart Pro is the cutting-edge device for programming

remotes, transponder keys and proximity keys and for

reading the PIN codes for numerous manufacturers.

HSD Electrics uses a computerized Premium Key cutting machine to create or copy vehicle keys.

Specialist Connector service

We are based in Basingstoke and offer a complete mobile service covering the following areas: Berkshire, Hampshire, Wiltshire and Surrey.

Bodyshops are faced with a very expensive cost when they have to purchase a new loom from the manufacture, as they wont supply them with the replacement plugs kits that have been damaged in the accident, we can offer a solution...

We cover most makes of vehicle....
